

# AIT Worldwide Logistics Joins EPA's WasteWise Program

**November, 2008** - Demonstrating its ongoing commitment in reducing its carbon footprint, conserving natural resources and protecting the environment, AIT Worldwide Logistics has joined the U.S. Environmental Agency's WasteWise Program.

Focusing on three key elements of waste reduction – waste prevention, recycling, and buying or manufacturing recycled content products – the voluntary partnership program was designed by the EPA in 1994 to help organizations implement practical methods for reducing municipal solid waste.

Extensive research has shown that conserving materials through waste prevention and recycling saves energy and reduces pollution, including emissions of greenhouse gases that contribute to global warming.

“The ongoing support and guidance that WasteWise has given us has allowed both organizations to accomplish common goals,” said Ralph Obenauf, compliance coordinator for AIT Worldwide Logistics. “It has been a rewarding partnership that will continue the future successes of AIT's existing waste prevention activities.”

In addition to WasteWise, AIT Worldwide Logistics is also a member of the EPA's SmartWay<sup>SM</sup> Transport Partnership, a program aimed to reduce greenhouse gas and air pollutant emissions within the transportation industry.

## About AIT Worldwide Logistics:

Offering custom-built IT solutions, flexible worldwide service offerings, competitive price structure and superior customer service, AIT provides a variety of value-added services to enhance supply chain efficiencies.

Spanning numerous nationwide locations and an ever-increasing network of international partnerships, AIT designs tailored transportation solutions

Preserving Resources,  
Preventing Waste

for the unique applications and delivery service requirements of individual customers across the globe.

Providing a scope of flexible service offerings by ground, air, ocean and rail, employees dedicate themselves to serving a wide variety of vertical markets and industries, including perishables, pharmaceuticals, automotive, energy, oil and gas and all branches of the government.

## About WasteWise:

EPA launched WasteWise in January 1994 as a voluntary partnership program designed to help organizations implement practical methods for reducing municipal solid waste.

Businesses, local governments, and nonprofit organizations of all sizes and from all industry sectors join the WasteWise program in order to encourage the reduction of municipal solid waste and select industrial wastes through waste prevention, recycling, and buying or manufacturing recycled products.

WasteWise membership boasts nearly 1,700 partners representing a wide array of businesses, institutions, and government agencies.
