

AIT Contract Logistics for Healthcare Supply Chains

Integrated contract logistics solutions for healthcare organizations

Healthcare supply chains demand precision, visibility and reliability at every stage. Whether you're supporting hospitals, laboratories, medical device manufacturers, dental practices or other healthcare providers, delays, inventory shortages and handling errors can directly affect patient care and business performance.

AIT's contract logistics experts help healthcare organizations streamline complex supply chain operations through customized solutions that integrate warehousing, inventory management, transportation coordination, value-added services and distribution support. Our experienced teams work as an extension of your operation, helping ensure critical products, equipment and supplies are available when and where they're needed. control and confidence.

Built around your operation - not ours

No two healthcare supply chains are alike. That's why AIT develops contract logistics solutions tailored to your specific products, regulatory requirements, service commitments and operational goals.

Our collaborative approach begins with understanding your challenges, workflows and performance expectations. From there, we design and implement scalable solutions that improve efficiency, increase visibility and support consistent execution across your network. Whether you're managing medical equipment deployments, supporting field service teams or optimizing inventory across multiple locations, AIT provides the expertise and operational discipline to help you achieve your objectives.

Core contract logistics product solutions and services

AIT's integrated approach helps healthcare organizations reduce complexity while maintaining control, visibility and service quality throughout the supply chain.

Solution area	AIT services
Inbound logistics and inventory management	Supplier coordination, receiving, inspection, inventory control, lot and serial number tracking, storage optimization and inventory visibility
Warehousing and distribution	Dedicated and shared warehousing, inventory management, order fulfillment, replenishment programs and distribution support
Kitting and value-added services	Product kitting, labeling, packaging, repackaging, light assembly and deployment preparation
Medical equipment deployment support	Project coordination, staging, inside delivery, appointment scheduling, field service coordination and installation support

Solution area	AIT services
Field service logistics	Inventory positioning, spare-parts management, technician support, emergency replenishment and service-parts distribution
Returns and asset recovery	Reverse logistics, equipment retrieval, returns processing, refurbishment support and disposition management
Implementation blueprint	Process design, systems integration, SOP development, KPI alignment, implementation planning and continuous improvement support

Why healthcare organizations choose AIT

Improve operational efficiency

Consolidate multiple logistics functions under a single provider to simplify processes, reduce administrative burden and improve supply chain performance.

Reduce risk and protect product integrity

Leverage standardized operating procedures, quality management processes and healthcare-specific expertise to support compliant, consistent execution.

Increase inventory visibility and control

Gain greater insight into inventory levels, product movement and order status to support informed decision-making and reduce disruptions.

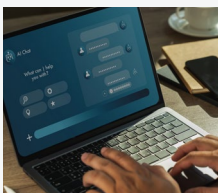

Scale with confidence

Adapt to changing demand, network expansion and evolving business requirements with flexible solutions designed to grow alongside your organization.

Support critical healthcare operations

Coordinate the movement and deployment of medical equipment, devices and supplies with specialized handling, proactive communication and precise execution.

Enhance the customer experience

Deliver a better experience for healthcare providers, patients, technicians and stakeholders through reliable service and coordinated execution.

A growing contract logistics footprint

AIT supports healthcare supply chains through a global network of more than 170 facilities, transportation providers and logistics professionals. Combined with our quality-focused operating model and customer-specific processes, this network enables us to deliver scalable contract logistics solutions that support healthcare organizations across local, regional and global markets.

A partner that works as part of your team

Healthcare supply chains require more than logistics execution—they require a partner that understands the importance of accuracy, responsiveness and reliability.

AIT contract logistics works alongside your team to design, implement and manage solutions that help improve performance, reduce complexity and support long-term growth. From inventory management and distribution to medical equipment deployment and reverse logistics, we help keep your healthcare supply chain moving forward.
